**Subject:** PM week of June 19 - balances, hoods, microscopes

**Importance:** High

Hello,

We will have several companies in beginning on Monday, June 19 to perform preventive maintenance on the hoods (BSC & CFH), balances and some microscopes.

Hoods:

B&V Testing will begin on Monday, June 19. I don't know where they will start that day, as UMass is responsible for this scheduling. They will decontaminate the hood in room 755B that afternoon at about 4 pm. This hood will be neutralized the morning of Tuesday, June 20. Later that day the filters for this hood will be replaced.

Balances:

Caley and Whitmore will begin the PM on the balances on Monday, June 19. They will spend Monday in the Drug lab.

Microscopes:

There are only 7 microscopes that will be done this month. These specific scopes are done twice per year. Caley and Whitmore will be here on Friday, June 23 at 12 noon to perform the PM on these scopes. The individual labs will be notified.

We will work out a more specific schedule on Monday. If there are any days when your lab will be unavailable, due to a training session, please let me know so we can adjust the schedule. As in the past, we will attempt to set up the sign in for the secured labs at the same time.

Thanks,  
Peggy
